

Reference CP13-113-000

29 May 2014

John A. Eney  
12116 Double Tree Lane  
Lusby, MD 20657

Ms. Kimberly Bose  
Secretary, Federal Energy Regulatory Commission  
888 First Street N.E., Room 1A  
Washington, DC 20426

Dear Secretary Bose:

I am writing you today to state my **FULL SUPPORT** for the FERC Environmental Assessment of the proposed **Dominion Cove Point LNG Export Project** in Calvert County, MD. I speak from 35 years of federal civil service as a supervisory aerospace engineer with the U.S. Navy, having degrees in Mechanical Engineering (Catholic University) and Aerospace Engineering (Princeton University), and as an 18 year resident of Lusby, MD, now retired.

My information is based on a thorough personal study of the FERC Report (Docket CP13-113-000) as presented to me in the form of a CD, dated May 2014. I find that this report is a most thorough and highly detailed explanation, in plain English, of all the potential social and environmental issues embodied in this large construction and operation project, with due diligence in the application of all relevant published scientific data from highly qualified scientific laboratories and agencies worldwide. Where details remain to be clarified, there is proper statement by FERC of the required methods by which those details need to be provided and vetted before final permits are authorized by both federal and state authorities.

In closing, I commend FERC for this excellent scientific assessment and the professional reporting of all data used in drawing supportive conclusions with requirements for further approvals as work proceeds in a logical stepwise manner.

Sincerely,

  
John A. Eney
